### **See if you can find the 5 mistakes and correct them**

I want to tell you about my plan for my morning commute. Usually, I'm taking the backroads into work, but today I'm planning a different route. I'm really excited about this new plan because I think it's going to save me at least 20 minutes a day by avoiding the busiest highways. If you look at this map here, you are seeing that this smaller country road is running right along the highway, and according to Google Maps, there's usually no traffic on this smaller country road. This is meaning that if I am driving this way every day, I can save 100 minutes each week! I'm planning to use that time by working out at the gym every day! I love to exercise, but I am not usually having enough time to do so, but with this new plan, I imagine that I can get into really good shape before the Christmas holiday arrives.
